# Care After Your Plastic Surgery Procedure

- After hand surgery, keep your hand elevated (raised up) above your heart for 24-48 hours to keep pain and swelling down. Keep moving your fingers.
- You may have some discomfort when the freezing wears off. Tylenol® (acetaminophen) or Advil® (ibuprofen) will usually help.

## **Suture (stitch) line care:**

- If you have a dressing, keep it on and dry for \_\_\_\_\_ days.
- You can then take the dressing off and wash the area gently with soap and running water each day.
- Do not scrub the area.
- Buy a small tube of Polysporin® ointment (not cream) or Vaseline®. You do not need a prescription. Put this ointment on the suture line once or twice a day. Clean away the old ointment before applying new ointment.
- Cover the area with a Band-Aid®.

## Suture line with Steri-Strips™

- Keep the area dry for 24 hours.
- After 24 hours, it is OK to let the area get wet and pat it dry. Leave the Steri-Strips™ on until they curl up and fall off on their own, or for \_\_\_\_\_ days.
- 2 weeks after your sutures are taken out, start massaging your scar with a moisturizing cream. This will help to soften and flatten the scar tissue.

## Problems

- If there is bleeding through the dressing, use your hand to keep firm, constant pressure on the dressing for 10-15 minutes.
- If the surgical site (scar) gets red, swollen, and tender, it may be infected.
- **If you are worried that you may have an infection or other urgent problem, follow these steps until you are able to get help:**
  1. Call your surgeon's office during regular hours:  
Dr. \_\_\_\_\_  
Phone: \_\_\_\_\_
  2. See your family doctor.
  3. Call 811.
  4. Go to the nearest Emergency Department.

## Follow-up plan:

- See your family doctor in \_\_\_\_\_ days for suture removal.
- Your sutures do not need to be taken out; they will dissolve (go away) on their own.
- See Dr. \_\_\_\_\_ on \_\_\_\_\_ at \_\_\_\_\_ a.m./p.m. in the Plastic Surgery Clinic on the 4<sup>th</sup> floor of the Halifax Infirmary building. Enter at the Robie Street entrance. Register at the kiosk, then turn left to go to the waiting area.

If you need to **change** your appointment, call the Clinic at 902-473-7518.
